

Compatibility Guide

General Notes

Active Ingredient

Only a selection of products and brand names are included for each active ingredient. Compare the AI of the commercial product in question with the table.

Compatibility

Tank Mix – Terradigm XP applied by being added directly into a mix tank with other commercial product(s).

- It is assumed products are being applied as the suggested label rate, unless otherwise mentioned in the table below.
- Tank mixes must be applied within 6 hours of the Locus product being added to ensure efficacy. Do not hold tank mixture for later use.

Simultaneous – Terradigm XP applied at the same time as other commercial product(s), but from separate mix tanks.

Sequential – Terradigm XP applied between other commercial product(s). The timing can vary depending on crop and/or product application schedule.

Dilution

Always add Terradigm XP to diluted chemical, unless fertilizer is used at full strength, and can be added directly without the addition of water.

Water used in tank mix or product preparation should be non-chlorinated.

Key

 Yes	 No	TBD = To be determined
--	---	-------------------------------

Fertilizer

Product Name	Tank Mix	Simultaneous	Sequential
6-24-6	✓	✓	✓
7-2-8-Citrus	✗	✗	✗
7-21-0	✓	✓	✓
10-34-0 (Must be used within 4 hours of mixing)	✓	✓	✓
Begin Fertilizer (7-23-4-0.25Zn)	✓	✓	✓
CAN-17 (CAN-17 should be diluted to 1:20 for tank mixes)	✓	✓	✓
Integrus 7-23-4-0.5Zn	✓	✓	✓
UAN-32 (UAN-32 should be diluted to 1:10 for tank mixes)	✓	✓	✓

Fungicide

Active Ingredient	Product Name	Tank Mix	Simultaneous	Sequential
Ethylenebisdithiocarbamate	Manzate™	✗	✗	✓
Azoxystrobin	Quadris®	✓	✓	✓
Mefanoxam	Ridomil	✓	✓	✓

Herbicide

Active Ingredient	Product Name	Tank Mix	Simultaneous	Sequential
Glufosinate-Ammonium	Cheetah®	✗	✗	TBD
Glufosinate-Ammonium	Liberty®	✓	✓	✓
Glyphosate	RoundUp®/Credit	✓	✓	✓
Oxyfluorfen	GOAL® 2XL	✗	✗	✗
