

Bombigro™

All Crops

FOLIAR TREATMENT

PRODUCT DESCRIPTION

Bombigro™ may be used as part of a foliar program to enhance photosynthesis, plant vigor and crop yield. Bombigro augments a balanced crop nutrition program. **For commercial agriculture use only.**

DIRECTIONS

Directions for use: Conduct a jar test to ensure tank mix compatibility before use. Agitate the product to ensure it is uniform.

Application rate is one (1) gallon per acre. Up to two (2) gallons per acre can be used in a growing season. Bombigro can be applied through aerial application with an airplane or drone. No dilution is necessary. Contact your Locus AG representative for timing and application details.
